

A. Metric levels with the source quota off vs on (conditional_93, both forms pooled, 186 pairs)

Quota at the retrieval depth of the frozen evaluation (20) $\equiv$ quota off (186/186 lists identical).
Hit@1 is identical under both settings (0.6935); resampling is clustered by question.
Red marks an interval that crosses 0.

B. Paired bootstrap of the difference (2,000 resamples)
